Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:

Claim 2 is allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that the sliding tongue comprises a flat body and a relatively thick rim extending around the body in order to give strength to the body.

Dreifert (US 5,318,333) disclose a casement window operator apparatus comprising a housing having a main body (10) and a cover (11). A sliding tongue (23) is fitted between the cover and the main body. The sliding tongue includes an extension that includes a U-shaped opening (29) for engaging a connector (22) on a window-moving linkage (20). The main body is connected to a lever (13).

Rotondi also discloses a casement window operator apparatus (10) comprising housing having a main body (50) and a cover (68). A sliding tongue (30) is fitted between the cover and the main body. The sliding tongue includes an extension that includes a U-shaped opening (32) for engaging a connector on a window-moving linkage. The main body is connected to a lever (112).

Olsen (US 5,582,445) teaches that is known in the art to have a window operator apparatus (10) made of a plastic polymer polymeric (Col. 4 Lines 25-36).

However, either Dreifert or Rotondi, as modified by Olsen, fails to disclose that the sliding tongue comprises a flat body and a relatively thick rim extending around the body in order to give strength to the body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
